

HTML AND CSS TAGS

`<html></html>` : When you start an html project. Everything else goes in between these tags.

`<h1></h1>` : The biggest text

`<h2></h2>` : Next big text

`<h3></h3>` : Smaller text

`<p></p>` : To start a paragraph

`` : For links

`
</br>` : For spaces

`` : unordered list (bullets)

`` : List items (can be numbered or bullets)

`` : Ordered list {numbered}

`` : To insert images

`<head></head>` : link your css style sheet

`<title></title>`: whatever you write in here will be displayed in the tab

`<body></body>` : content of your website

`<style type="text/css"></style>`

`{font-weight:bold;color:__;}`

`{background-color:__;}`

`{font-family:"_____"}`

`{font-style:_____}`

`{font-size:40px}`

You can also create a file in sublime _____ .css and put it on the html document.

This would go inside the `<head>` so the style can be applied to all of the page as the computers read the script from top to bottom.

Example: `<link href="dirkstyle.css" type="text/css" rel="stylesheet">`
